LYMPHEDEMA RESEARCH: CALL FOR PARTICIPANTS

The Alberta Lymphedema Association is committed to supporting, empowering, and advocating for those impacted by lymphedema. We are pleased to introduce an opportunity through which Alberta lymphedema patients may contribute to the universal knowledge of lymphedema!

Researchers at the University of Calgary are currently recruiting participants for a study exploring the impact of leg lymphedema on quality of life. If you have lower-extremity lymphedema caused by cancer treatment and have completed your cancer treatment (i.e. Radiation, chemo, surgery), you may be eligible to participate.

If you would like to learn more about this exciting study and/or would like to become involved, please see below for information on contacting the research team:

Study Coordinator: Catharine Bowman,
+1 (403) 698-8183 or catharine.bowman@ucalgary.ca

Principal Investigator: Dr. Linda E. Carlson,
linda.carlson@ucalgary.ca

The Health Research Ethics Board of Alberta – Cancer Committee, which oversees the ethical conduct of research involving humans, has reviewed and accepted this study
